

Scientist (Biology)

Summary:

Pheast is seeking a talented and highly motivated Scientist to join our Biology group. The successful candidate will be a passionate scientist with strong technical skills and a background in cancer immunology. The candidate will be expected to work in a fast-paced, nimble startup, and effectively collaborate with colleagues across scientific teams to advance preclinical drug development. This position will report to the Director, Biology.

Responsibilities:

Position responsibilities may include, but are not limited to:

- Develop and validate assays relevant to myeloid cell immunotherapy targets
- Plan, execute, analyze, and interpret *in vitro* and *in vivo* assays for target validation and drug lead selection
- Accurately document and present research findings to colleagues at team meetings
- Maintain an up-to-date understand of relevant scientific literature and methodology
- Collaborate closely with Protein Science team, Discovery team, and other functional areas, contributing wherever necessary to advance Pheast programs
- Help to establish and promote an inclusive, collaborative, and innovation driven company

Requirements:

- PhD. in biology, immunology, biochemistry or related field with 5+ years of experience
- Hands on experience in immuno-oncology techniques (including multi-color flow cytometry and primary immune cell functional assays)
- Attention to detail with strong organizational and record keeping skills
- Excellent communication and interpersonal skills with the ability to work both independently and collaboratively in a dynamic and fast-paced environment

Desirable:

- Track record of scientific accomplishments as evinced by quality and quantity of publications and/or inventions and/or successful grant applications
- Experience collaborating in a cross-functional capacity
- Experience with *in vivo* models of oncology and/or immunology
